

NS-20
Bedside tables

Part of the medical beds

Bedside tables are an integral accessory of medical beds. They increase the comfort and independence of patients during hospitalisation and at the same time reduce the burden on the nursing staff.

NS-20

Double-sided metal table suitable for hospital environments. Increases comfort and independence for patients with reduced mobility. A wide range of colours ensures a perfect match with the interior of the hospital room.

Drawer

The drawer with a drop-out safety catch can be supplemented with a lock (independent or as a central key system), so that the patient's personal belongings are always safe.

Plastic drawer insert

The plastic drawer insert is divided into two parts for easier organisation of personal belongings. It is also easily removable and cleanable.

Easily accessible shelf

The open storage shelf is particularly suitable for personal items of frequent daily use.

Container

Container with space for personal belongings and enough height for a PET bottle. The double sided design of the container is a versatile solution that allows the use of a bedside table on both sides of the bed.

Storage space for shoes

A practical shoe storage compartment is located at the bottom of the table.

Optional equipment

Lockable drawer and container

The drawer and container can be locked on request.
The patient does not have to worry about losing personal items.

Towel holder

The bedside table can also include a towel holder. The holder is located on the side of the table, this way the patient will always have the towel at hand.

Choice of design

The choice from a wide range of colours ensures a perfect match with the interior of the hospital room.
